

3 Courses

Introduction to Accounting Data Analytics and Visualization

Accounting Data Analytics with Python

Machine Learning for Accounting with Python

Mar 27, 2024

Rowan Bittner

has successfully completed the online, non-credit Specialization

Accounting Data Analytics

The certificate proves that the learner has developed an analytics mindset and knowledge of data analytics tools and techniques. The learner has developed skills to use multiple tools and techniques (including Excel, Python, and Tableau) for data preparation, data visualization, data analysis, and data interpretation and the ability to apply such skills to real-world problems. The learner has also developed skills in machine learning using Python, including classification, regression, clustering, text analysis, time series analysis, and model optimization, as well as the ability to apply these skills to real-world problems.
